

Key Instant Recall Facts (KIRFs)

Reception Spring 1 – Counting to and from 20

For the remainder of this academic year, Reception will receive recall maths homework every half term. This is to improve their basic mathematical skills which they will then apply throughout this and later years.

The first of these will be counting to and from 20.

Below there is a number line to 20, the numbers 1-20 and numicon from 1-10. Each can be used in different ways.

- The number line is brilliant for showing the order of numbers and how it increases and decreases.
- The numicon gives a visual representation of what each number actually is.
- For an extra challenge you can ask what is 1 more or 1 less, or hide a number and see if they can work out which is missing.

You could make them into a poster or cut them up and organise them from least valuable to most valuable.

1 2 3 4 5 6 7 8 9 10 11 12

13 14 15 16 17 18 19 20
